

The first and only yield-farming, vaults and staking deflationary token with no admin control

\$YVS

yvs.finance

@YVSFinance

Project Overview

- Yield-farming
- Vaults
- Staking
- No governance
- No admin control
- Automatic uniswap liquidity
- All functionality pre-programmed in the contracts, audited before launch

Total token supply created on deploy:

2.000.000

\$YVS

0.75% burn rate on all transactions except to/from pools

Presale

- Tokens can be claimed after end, distribution of raised ETH is automatic.
- 30 % Uniswap Liquidity (locked for one year)
- 20 % Team
- 30 % Marketing
- 20 % Exchange listing
- Referral system (1 % split between referrer and user)
- Bonus per day
12.5 %, 7.5 %, 5 %, 2.5%, 0 %
5-day presale

1 \$YVS = approximately 13 USD

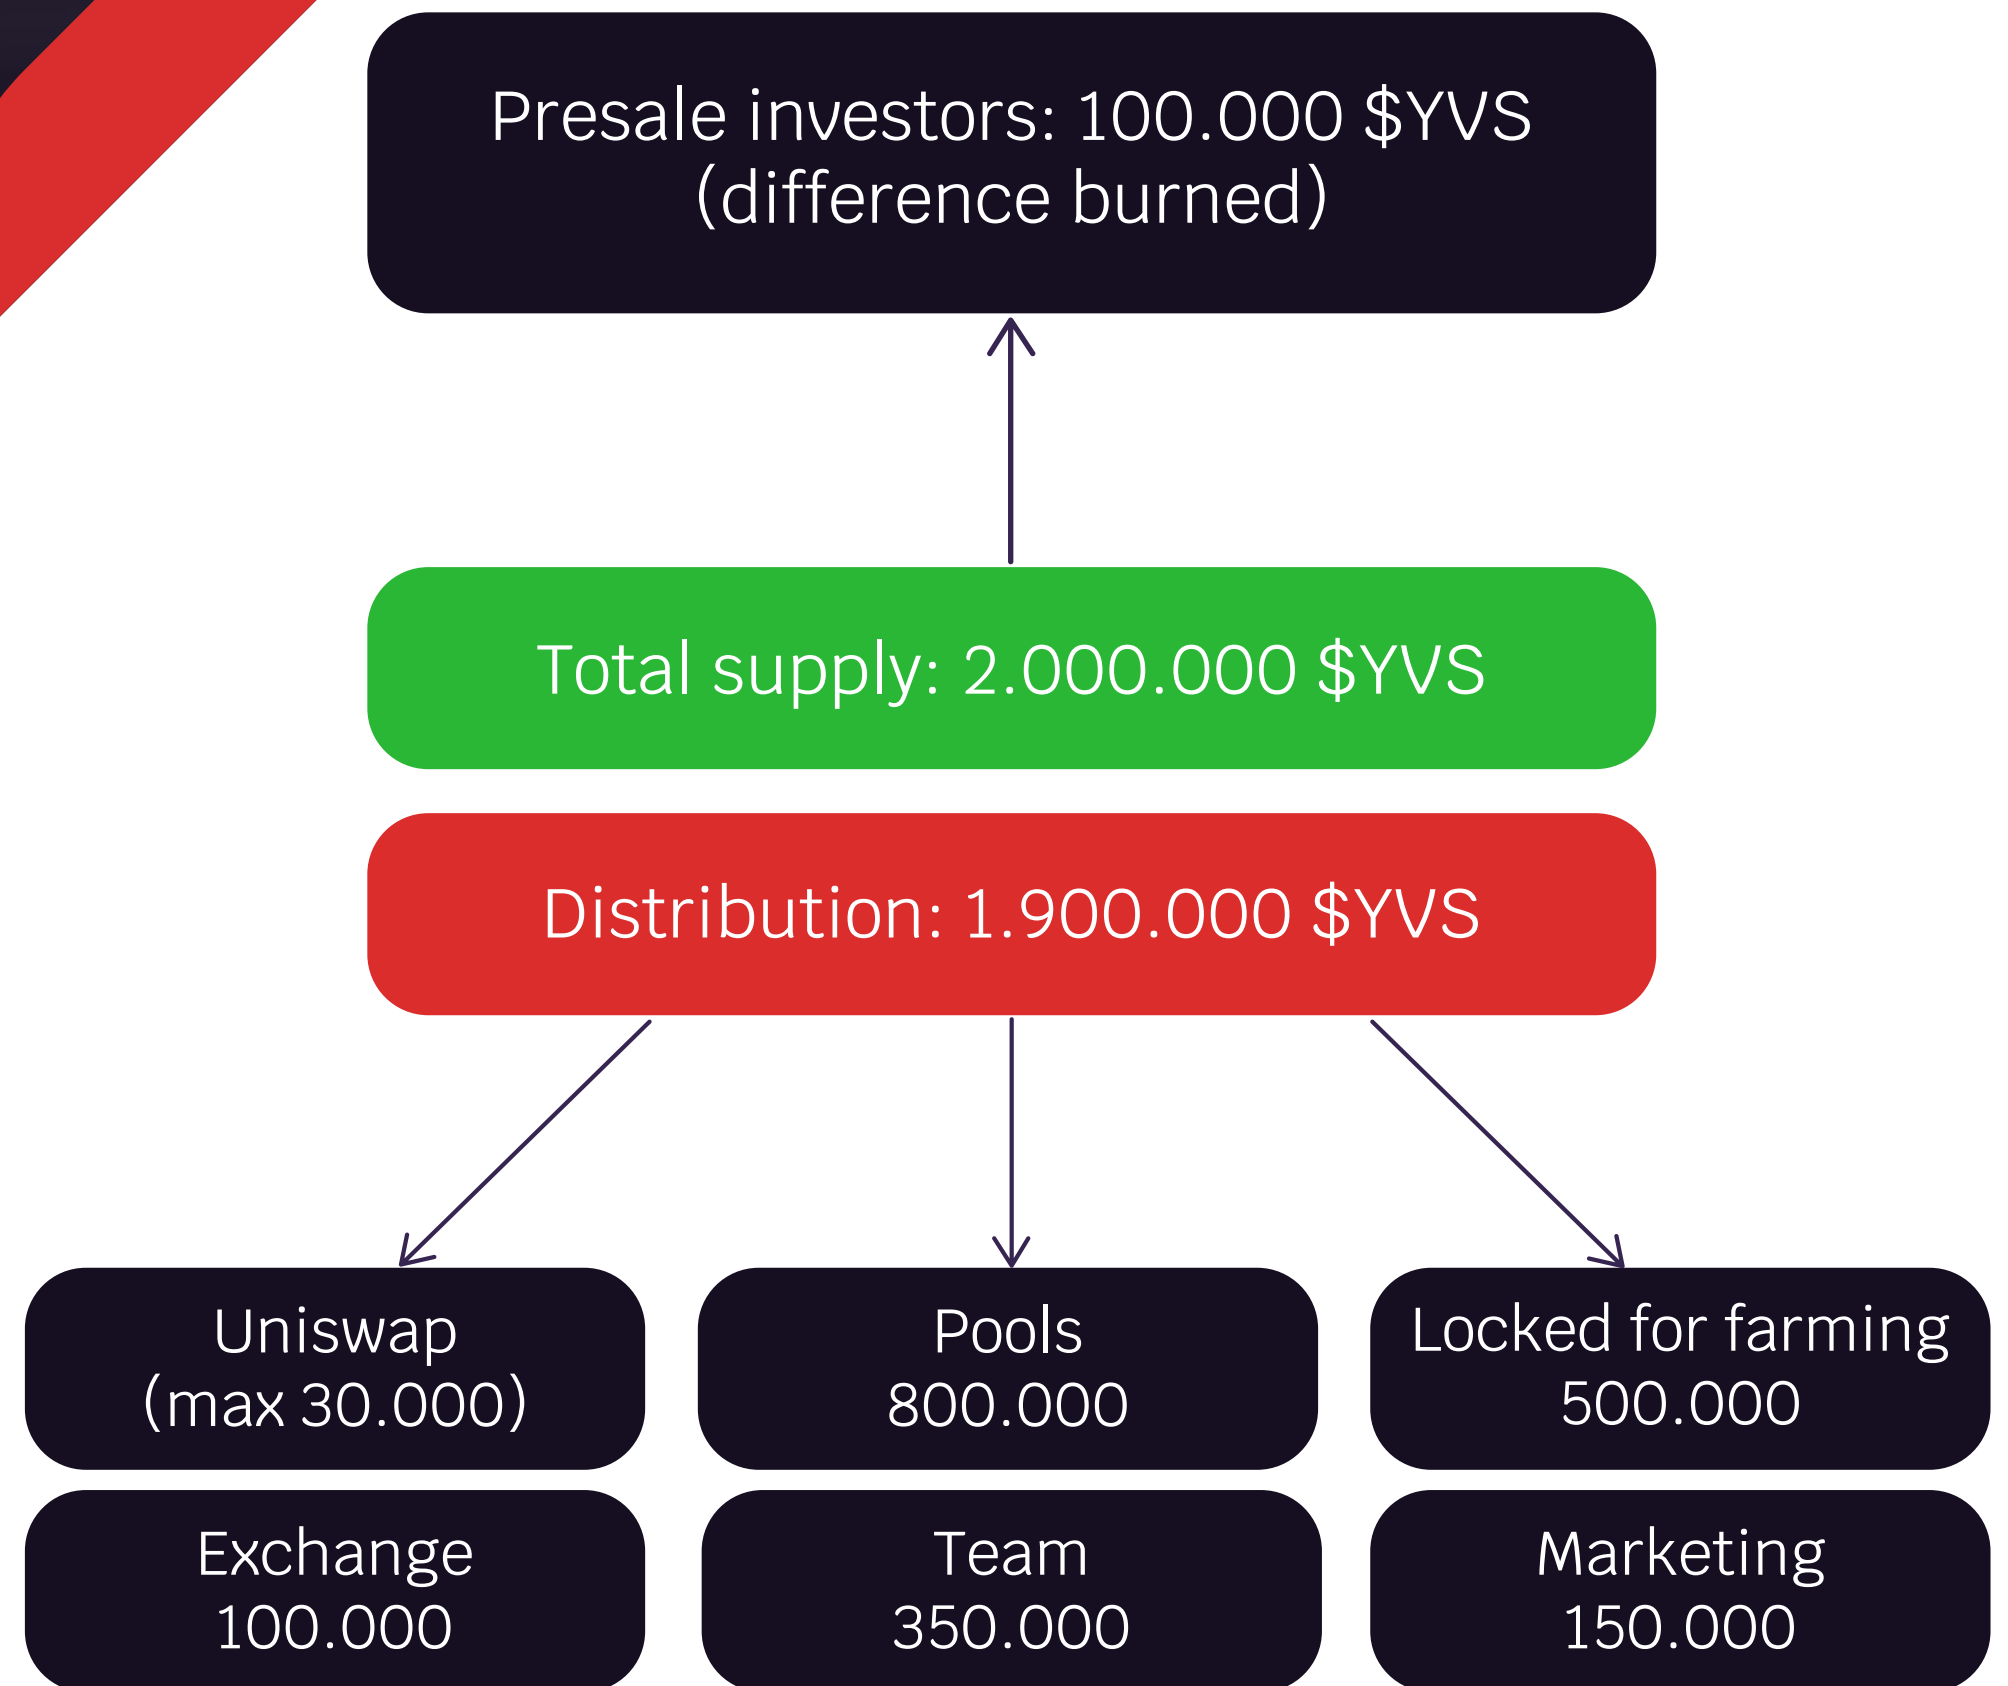

1 ETH = 45 \$YVS

Distribution:

- 100.000 \$YVS max
- 1 ETH min per investor
- 50 ETH cap per investor
- No soft cap
- Unsold tokens are burned

Distribution

- Uniswap pool is programmatically created with 30 % of collected ETH + equivalent amount of YVS from the base price
1 ETH = 45 \$YVS
- A max of 30.000 \$YVS will be deposited

Pools

- 800.000 \$YVS distributed into pools for 20 months.
- Staking pool (20 % of round)
- Liquidity pool - ETH-YVS (65 % of round)
- Two vault pools - stablecoins and wrapped bitcoin (15 % of round)
- After the initial 20 months, 80% of the funds collected by the burn rate will be reinvested into the next round and so forth every 3 months
- The distribution contract automatically takes care of sending funds to pools and activating them

yvs
FINANCE

Staking Pool

- Deposit is locked for a minimum of 2 weeks.
- For every extra week the user locks his funds for, he receives a multiplier of 1 % for a maximum of 12 weeks
- Possible partnerships for additional VIP staking pools

20 % of each round
 $(12-2)^* 1 \% = 10 \%$ Max boost

Liquidity Pool

- 50 % of deposited LP tokens will be locked forever (can not be accessed anymore)
- LP tokens will be locked to ensure price stability, low slippage and continuous trading

65 % of each round
ETH-YVS

Vault Pools

- 1 week locking period, withdrawal fee of 0.25 %
- Five multipliers can be bought – 5 %, 10 %, 15 %, 20 %, 25 % to increase share of reward
- 10 % performance fee (paid to strategists)

15 % of round

2 pools

1 Stablecoin vault
(Curve)

2 Wrapped bitcoin vault
(Curve)

Burn Rate

- 80 % is sent to the distribution contract for future rewards
- 15 % of the burn rate goes to the treasury
- 5 % will be indefinitely burned

0.75 % Burn rate

Summary

Contract functions

All mentioned contract functions are **pre-programmed** and can **not be changed** in the future (the contracts will have no owner privileges)

Contract security

Token contracts are audited pre-launch by a reputable cyber-security firm, hand-picked by the developer team to provide the most secure platform

There is no governance system and the protocol is completely decentralized.
